

# eeZeeBin SYSTEM

The newly introduced Interwaste **eeZeeBin** system allows for the collection, at source, of recyclable materials previously destined for landfill. The easy to use system is designed so that all recyclable materials including paper and cardboard, plastic, glass and cans can be deposited into a single bin without further sorting and separation. Dedicated collection vehicles are employed to regularly collect and compact the waste before transporting it to company Materials Recovery Facilities for final sorting and reprocessing. 6m<sup>3</sup> bins are available for use at high volume generation points with 240 litre wheelie bins utilised when requirements are smaller. Interwaste also supplies special boxes for the collection of recyclables in offices. **eeZeeBins** are currently deployed at commercial and industrial clients, shopping centres, sports facilities, offices and housing estates.

For further information on our wide range of products and services or for details on our operational centres throughout southern Africa please contact Head Office.
