

HAZPAK SERVICES

**It's Easy. It's Safe.
It's Interwaste.**

The newly introduced HazPak system responds to the needs of environmentally aware generators of low volume hazardous wastes. Legislation prohibits the inclusion of these materials with general waste and historically no solution to this situation has been available.

HazPak is a simple pre-paid system whereby Interwaste supplies and delivers to the customer containers designed for specific hazardous waste materials. The customer collects and stores the materials in these containers. When full, the container is sealed and then collected by Interwaste for appropriate handling. As appropriate, materials are treated and recovered, recycled or disposed of. A safe disposal certificate is issued assuring the customer that all legal compliance requirements have been satisfied. At that time Interwaste can deliver a replacement container.

The HazPak system currently provides for the management of: Fluorescent Tubes, Pharmaceuticals, Domestic and Commercial Batteries, Asbestos Wastes, Ink and Printer Cartridges, Electronic Waste and Oil Contaminated Materials.

Custom solutions to suit specific customer requirements can be arranged.

HAZPAK CATERS FOR

FLUORESCENT TUBES

COMPACT FLUORESCENT TUBES (CFL)

LABORATORY WASTE

PHARMACEUTICAL WASTE

OIL AND GREASE CONTAMINATED RAGS Etc.

ELECTRONIC WASTE

ASBESTOS BRAKE LININGS

PRINTER CONSUMABLES WASTE
