

# AUTOHAZMAT SERVICES

Due to the hazardous nature of waste materials generated by garages, workshops and service stations, Interwaste has initiated AutoHazMat Services, structured to meet the needs of these customers.

Custom designed waste containers are supplied to accept oil contaminated rags and absorbents as well as oil and fuel filters, empty oil cans and bottles, paint and solvent containers, asbestos brake and clutch parts etc. Full containers are collected either on-demand or at pre-determined service intervals and are replaced with empty, sanitized containers. Safe disposal certificates are issued after the removal and replacement of these containers, assuring the customer that the hazardous contents are handled in an environmentally correct manner.

Interwaste also supplies garages and workshops with pre-printed Peace of Mind Certificates. These are normally attached to the clients repair invoice assuring that any hazardous wastes generated during work on their vehicle have been correctly disposed of.

Interwaste also supplies a waste sawdust based absorbant material which is cost effective enough to use for daily clean-up situations.

## BE AWARE OF THESE HAZARDOUS WASTES

These types of automotive hazardous wastes must be placed in the correct bins for safe disposal. They may not be discarded with general waste.
