

CONTRACT CHIPPING, CHIPPERS & TUB GRINDERS

CONTRACT CHIPPING

Interwaste is able to offer a contract chipping service, utilising modern technology, to the construction and landscaping industries. Recent successful projects have involved the construction of golf courses which had to be cleared of specific heavily wooded areas.

Major benefits of utilising an in-situ chipping system include the immediate production of suitable organic material which can be composted and returned to the soil during later construction phases.

Interwaste utilise a range of chippers and grinders able to handle a wide range of applications. All units are available for hire, logistics permitting.

VERMEER HG6000 HORIZONTAL GRINDER

The Vermeer HG6000 is a heavy duty horizontal grinder that is utilised for the efficient grinding of high volumes of organic waste material.

SPECIFICATIONS

Dimensions	13.4m(l) x 2.8m(w) x 4.1m(h)
Weight	25 400kg
Power Unit	470kw
